

## Mobile Pixels Geminos (FHD)

A vast, flexible and immersive canvas right above your desktop! Geminos Series is designed ergonomically by stacking monitors one over the other via our linkage system. Whether you're looking for a dual vertical monitor or two horizontal displays aligned in a vertical way, all you need is just a few mouse click. There is no cumbersome actual rotation of the screens anymore.

Ready to have a good screen time? Geminos Series brings much comfort on your eyes, neck and wrist. Sophisticatedly arranged two stacked monitors from top to bottom, it helps to reduce the range of movement of your eyes and neck, as well as less scrolling.

### Display

Two 24-inch IPS displays QHD or Full HD options Touch-enabled screen

### Ergo Design

Screens stacked vertically Adjustable viewing angle Adjustable height

### Convenience

USB Type-C PD up to 100W 1080p webcam and 2 speakers 10-in-1 docking station

# Less Bezel, Max Concentration

High functionality meets superb style with an ultrathin bezel design that allows you to see more with less distraction on these 24" screens.

## Personalized Workflow

# Inspire Focus.Speed Up Creativity.

The Geminos Series, featuring dual vertical monitor, is ideal for media creation and editing tasks as well. Simply spread out the elements of your software to have everything visible. Dual vertical monitors setup helps to save your valuable time from searching and scrolling, so you can focus on the creative part. Keeps your producing and entertaining flow more organized and smoother.

# Loaded With Features. Free Up Desk Space.

Webcam, speakers, microphone and more are built into the Geminos Series, eliminating the unsightly devices strewn about your desk, offering a clutter-free desk space. Makes it the best vertical monitor on the market. Features an advanced front facing Full HD camera with a 1080p resolution that clearer than before. Moreover, that gives you up to 15 degree tilt rotation control to get the right angle when you need to. Built-in a pair of 3W speakers and microphone provide clear audio that enhance your sound experience.

# Sit-To-Stand Flexibility

The best posture is your next posture. Thanks to our linkage system, the Geminos Series is infinitely adjustable unlike other dual monitor stacked. The top monitor slides up and down, and the bottom monitor pivots in and out to create an angled visual appearance surface. Made switching between sitting and standing through the day without hassle. It's compatible with every posture!

## Docking Station

# Expanded Connectivity. No Extra Footprint.

We've engineered the stand with the USB Type-C 10-in-1 multiport dock to turn the Geminos Series vertical monitor to serve as a productive with no extra footprint while less clutter in your setup. 10 multiple ports bring a complete solution allowing you to connect to monitors, network, SD cards, and more through the docking station. so it's fully equipped for almost any accessories you may need to plug in. Connect your device and peripherals to the Geminos's docks, sleekly tucked in behind.
