

# Mobile Pixels Trio 2Pak

## Overview

Introducing the new Trio and Trio Max, our upgraded triple-screen, plug-and-play monitors where you can go from one screen to three. Easy to use as a ultimate solution for the working professionals, gamers, stock traders, entrepreneurs, coders, and more - always on the go.

- Brand new all-in-one design
- 20% thinner and 1 pound lighter than the previous generation
- Two screen size options (13.3" and 14.1")
- 1080 Full HD, IPS display
- Eye-care mode
- Quick connectivity with any laptop with a USB-C or USB-A port
- Compatible with Windows, macOS, Nintendo Switch and Dex

### Highlights:

Two screen size options

1080p Full HD

2 Built-in sliding screens

Built-in kickstand

Eye-care mode

Pass through charging

**Built-in kickstand**

## **Brand New All-in-one Design**

We ditched the magnets...kind of. They're completely optional now thanks to an all-in-one design.

Use the magnets if you love them to attach Trio or Trio Max to your laptop or leave the magnets behind using our new built-in kickstand. No more clunky clips to hold your screens in place.

**Four modes**

## **For Ergonomic Comfort and Various Scenarios.**

The Trio & Trio Max telescope via a second stage sliding mechanism now. This allows the screens to slide in and out of their housing even further, pivot about your laptop screen, and become completely hidden when fully collapsed for a cleaner look. You'll find how versatile the sliding screens are to satisfy multiple purposes.

### **01 Landscape Mode**

Use it as your secondary monitor as an extended display or mirrored display. Say goodbye to toggling between windows and tabs.

### **02 Collaboration Mode**

Rotate both screens back to form a triangle to collaborate with others.

### **03 Portrait Mode**

The portrait mode allows for increased font size, making it super convenient for you to read through the text. The portrait mode best serves web developers, content editors, content writers, proofreaders and programmers.

## 04 Presentation Mode

You can also flip the screen 180-degree to the front of your laptop and present the screen to anyone sitting across from you, whether it's a presentation to your team at work.

### Plug and play!

## Effortless, Multi-screen Monitors on The Go.

The Trio offers an innovative, easy and personalized setup for all your needs. Only 3 steps and it's ready to extend your vision.

- Attach Trio to your laptop via kickstand or optional magnets.
- Slide out displays.
- Connect cables to displays.
