[1] Energy Consumption based on 220 standard washing cycles for cotton programs at 60°C and 40°C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used.
[2] Water consumption based on 220 standard washing cycles for cotton programs at 60°C and 40°C at full and partial load. Actual water consumption will depend on how the appliance is used.
[3] “Standard 60°C cotton programs” and the “standard 40°C cotton programs” are the standard washing programs to which the information in the label and the fiche relates and these programs are suitable to clean normally soiled cotton laundry and that they are the most efficient programs in terms of combined energy and water consumption.
