

GO MIC

Portable USB Condenser Microphone

Further expanding on the already diverse line of USB microphones, Samson has created the Go Mic as a versatile computer-based miking and recording solution.

Because of its custom compact design, the Go Mic can clip right onto your laptop or sit unobtrusively on your desk. Plug and play operation also means it's completely compatible with a Mac or PC, with no drivers required. Perfect for recording music, podcasts or field recording, the Go Mic's range of functionality extends beyond typical USB microphones. It's also ideal for voice recognition software, iChat, web casting and even Voice over Internet Protocol (VoIP).

Thanks to its switchable cardioid and omnidirectional pickup patterns, you can pick whichever pattern is more appropriate for your specific situation. Plus, with a frequency response of 20Hz–18kHz and a resolution of 16-bit/44.1kHz, you can be sure you're getting professional audio specs in a compact, multi purpose design.

High-quality components and meticulous engineering ensure the Go Mic will offer clear, professional audio reproduction in any number of applications, especially on-the-go.

FEATURES
