### 2. COMPOSITION AND INFORMATION ON INGREDIENTS

#### Chemical Characterization

CAS#	Chemical Name	Percent
67-63-0	Isopropyl Alcohol	70%

### 3. HAZARD IDENTIFICATION

#### 3.1 Emergency Overview:

Isopropyl Alcohol is flammable liquid and vapour. It is harmful if swallowed or inhaled. Causes irritation to the eyes and respiratory tract and affects the central nervous system. May be harmful if absorbed through the skin and may cause irritation to the skin.

#### 3.2 Potential acute health effects:

**3.2.1 Inhalation:** Breathing in small amounts of this material during normal handling is not likely to cause harmful effects. However, breathing large amounts may be harmful and may affect the respiratory system and mucous membranes (irritation), behavior and brain (Central nervous system depression - headache, dizziness, drowsiness, stupor, incoordination, unconsciousness, coma and possible death), peripheral nerve and sensation, blood, urinary system, and liver.

**3.1.2 Eye:** Can cause eye irritation.

**3.1.3 Skin:** May cause mild skin irritation, and sensitisation.

**3.1.4 Ingestion:** Swallowing small amounts during normal handling is not likely to cause harmful effects. Swallowing large amounts may be harmful. Swallowing large amounts may cause gastrointestinal tract irritation with nausea, vomiting and diarrhea, abdominal pain. It also may affect the urinary system, cardiovascular system, sense.

#### 3.3 Potential chronic health effects:

**3.3.1 Carcinogenic Effects:** Classified A4 (Not classifiable for human or animal.) by ACGIH, 3 (Not classifiable for human.) by IARC [Isopropyl alcohol].

**3.3.2 Mutagenic Effects:** Not Available

**3.3.3 Teratogenic Effects:** Not Available

**3.3.4 Developmental Toxicity:** Classified Reproductive system/toxin/female, Development toxin [POSSIBLE] [Isopropyl alcohol]. The substance may be toxic to kidneys, liver, skin, central nervous system (CNS).

## 4. FIRST AID MEASURES

### 4.1 Description of first aid measures

**4.1.1 Inhalation:** If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention if symptoms appear.

**4.1.2 Skin contact:** In case of contact, immediately flush skin with plenty of water. Cover the irritated skin with an emollient. Remove contaminated clothing and shoes. Cold water may be used. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

**4.1.3 Eye Contact:** Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Cold water may be used. Get medical attention.

**4.1.4 Ingestion:** Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention if symptoms appear.

## 5. FIRE FIGHTING MEASURES

**5.1 General Information:** As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear.

**5.2 Extinguishing Media:** Small Fire: Use DRY chemical powder.

Large Fire: Use alcohol foam, water spray or fog.

**5.3: Products of combustion:** Carbon Oxides (CO, CO<sub>2</sub>)

**5.4 Special Fire Fighting Procedures:** Firefighters should wear self-contained breathing apparatus and full fire-fighting turn-out gear (bunker gear). Keep personnel removed and upwind of fire. Water should be used to keep fire-exposed containers cool.

**5.5 Fire and explosion hazards:** Slightly explosive in presence of open flames and sparks, of heat. Non-explosive in presence of shocks. Vapor may travel considerable distance to source of ignition and flash back.

### **CAUTION: MAY BURN WITH NEAR INVISIBLE FLAME.**

Hydrogen peroxide sharply reduces the autoignition temperature of Isopropyl alcohol. After a delay, Isopropyl alcohol ignites on contact with dioxygenyl tetrafluoroborate, chromium trioxide, and potassium tert-butoxide. When heated to decomposition it emits acrid smoke and fumes. (Isopropyl alcohol). Secondary alcohols are readily auto-oxidized in contact with oxygen or air, forming ketones and hydrogen peroxide. It can become potentially explosive. It reacts with oxygen to form dangerously unstable peroxides which can concentrate and explode during distillation or evaporation. The presence of 2-butanone increases the reaction rate for peroxide formation. Explosive in the form of vapor when exposed to heat or flame. May form explosive mixtures with air.

## 6. ACCIDENTAL RELEASE MEASURES

**6.1 General Information:** Use proper personal protective equipment indicated in Section 8.

**6.2 Environmental precautions:** Do not release to sewer, surface water or ground water.

### **6.3 Methods and materials for cleaning up spills:**

**6.3.1 Small Spill:** Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container.

**6.3.2 Large Spill:** Flammable liquid. Keep away from heat. Keep away from sources of ignition. Stop leak if without risk. Absorb with DRY earth, sand or other noncombustible

material. Do not touch spilled material. Prevent entry into sewers, basements or confined areas. Be careful that the product is not present at a concentration level above TLV.

## 7. HANDLING AND STORAGE

**7.1 Precautions:** Use proper personal protective equipment as indicated in Section 8.

**7.2 Handling:** Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/vapor/spray. Wear suitable protective clothing. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes. Keep away from incompatibles such as oxidising agents, acids.

**7.3 Storage:** Store in a segregated and approved area. Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame).

## 8. EXPOSURE CONTROL/PPE

**8.1 Engineering Controls:** Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.
