# Additional Smart Radiator Valve

Save even more energy

Complete your Smart Thermostat or your Starter Pack for district heating with Additional Smart Radiator Valves and take control of all your individual radiators. Thanks to the room-by-room schedule based on your daily routine, heat according to individual room use and save even more energy.

Energy Savings	Room-by-room comfort	Remote control dashboard	Open Window Detection	Smart Regulation	Manual Boost

Room-by-room comfort

Fine-tune your comfort temperature room-by-room.

Smart heating in your home

Open Window Detection

When the Smart Radiator Valve detects a window is open, it switches off the heating in the room to prevent energy waste.

Smart Regulation

The Smart Radiator Valve analyzes the room environment in real time and adjusts heating according to sunshine level and room use.

Manual Boost

When needed, the temperature can be temporarily raised in a specific room for 3 hours.

Simple and elegant design

4 interchangeable colours
Customise your Valve with one of the four colour adhesive strips provided.

Mechanics and design
Optimized for energy savings, 2-year battery life.

Translucent plexiglass cylinder
Opt for a timeless, minimalist design.

Manual temperature adjustment
Turn up the Valve to manually change the temperature setpoint.

Real-time temperature
Display the real time temperature in the room.

Additional Smart Radiator Valve's technical specifications
