Netatmo Smart Indoor Module

|			
Real-time indoor measurements	Data history	Real-time alerts	Indoor air quality

Multi-room

Connect up to three Indoor Modules and monitor all your rooms and measurements with a single application.

Family room

Having trouble relaxing in your living room? It may be due to the indoor air quality. Receive an alert if the CO2 level rises sharply.

Family room	Parent's bedroom	Baby's room	Kitchen	Child with asthma room	Basement

View your data history to understand changes in the room over time

View changes in your environment at a glance using charts accessible in the app. Humidity problems in the bathroom? Monitor how that evolves over time.

Customize your notifications to choose which alerts you receive

Receive the information that matters most to you - such as excessively high CO2 levels or a drop in temperature - directly on your smartphone.

Simple and elegant design

Long battery life

Energy-efficient, up to 1 year of battery life.

Practical

Put it wherever you like in the room you want to monitor; there's no need to plug it in!

In all your bedrooms

Monitor up to 3 rooms at the same time.
