

## Netatmo Smart Sensors

### **Take action even before an intruder breaks into your home**

The Smart Door and Window Sensors alert you to a problem even before a break-in occurs. Installed on the doors and windows of your choice, they can tell if someone is trying to force entry.

They also detect when a door or window is opened suddenly and send an immediate notification to your smartphone. This saves you valuable time in the event of a break-in.

### **See whether doors and windows are open or shut - directly in the app**

You can adjust the settings in your app to keep an eye on your home at all times by configuring Smart Door and Window Sensors to send you a smartphone notification if a door or window is kept open too long.

Just left home but think you might have left something open? You can check whether doors and windows equipped with a sensor are open or shut directly in the app.

## Easy to install

Smart and straightforward - that's the thinking behind Netatmo products. Our Smart Door and Window Sensors are no exception! Simply stick the one-piece waterproof sensors to any type of door or window.

## Enjoy the benefits of the complete Smart Alarm System with Camera.

Together, the Netatmo Smart Door and Window Sensors, the Smart Indoor Camera, and the Smart Indoor Siren form a complete Alarm System that protects your home and responds to break-ins. You can even select a specific Sensor to raise the alarm if someone tries to break into your home.
